

Recycling Solutions

Tailored solutions to drive efficiency and sustainability

Indovinya combines **deep expertise** in functionality with a **tailored portfolio of high-performance** solutions designed to boost both **efficiency** and **sustainability** in recycling processes.

InCycle®

Advanced solutions on defoamers and low-foam detergents ensure superior cleaning, enhanced flake quality, and optimal efficiency.

Customized Solutions

High-performance products boost our clients' production efficiency with tailored, impactful solutions.

Local Availability

Surfactants producer with local stock and high integration in Americas, benefit from faster delivery times.

Sustainability

More sustainable products, reducing production effluents, products made with renewable raw materials, and enhancing production efficiency.

Our portfolio offers **eco-friendly defoamers** and **low-foam detergents** for the cleaning stage of mechanical recycling – ensuring superior cleaning performance, **very positive flakes appearance**, and enhanced flake quality, with high stability in alkaline media – all **without alkylphenols or silicone**.

Contact our experts and learn more about our customized solutions.

About Indovinya

We are the specialty chemicals division of Indorama Ventures, an innovative chemical company, providing sustainable, high value-added solutions for the long-term success of our customers

Our Portfolio

InCycle® DT 1008

A **low-foam**, high-performance detergent system, alkylphenol-free and with excellent stability to alkalis.

InCycle® DF 0868

Silicone-free defoamer system that ensures high stability in alkaline media and improves flakes appearance by preventing silicone-based oily residues.

Sustainable partner

Indovinya is your sustainable partner for high-performance industrial solutions – driving efficiency, enabling decarbonization, and building a responsible value chain.

Technical Expertise

Indovinya applies advanced technology and deep chemical expertise to co-develop customized solutions that meet the specific performance and sustainability demands of the recycling industry.
